

## **Catalyse is a partner organisation of the Erasmus+ programme.**

Erasmus+ provides funds to finance actions and activities in the fields of education, training, youth and sport. This programme enables trainees, apprentices, trainers, and more generally, young people aged under 30 with or without qualifications to go abroad in order to develop their skills and increase their employability. It also has an important linguistic dimension. Erasmus+ strengthens cooperation between European organisations through international partnerships in which they are invited to share their innovative practices.

## **Catalyse joins the VET VR ACADEMY project!**

The hotel and restaurant industry is one of the sectors hardest hit by the sanitary crisis. Faced with this situation, many professionals have been forced to suspend or slow down their activities, or even to close the doors of their establishments. Vocational education and training have not been spared and new issues have emerged. In light of these changes, the **VET VR ACADEMY** project was launched.

### **What are the objectives of the VET VR ACADEMY?**

This project aims to promote the use of digital tools, including virtual reality, in the context of vocational education and training, to strengthen the skills of teachers and trainers in new technologies, to develop an ecological approach through online training, to meet the new needs of learners, to propose new learning methods, to develop intercultural and linguistic skills...

### **OUR PARTNERS**

Five organisations from France, Cyprus, Denmark, Germany and Spain are taking part to this project. They are VET providers, virtual reality experts, training centres and educational project experts.

- Pistes solidaires (European non-governmental organisation)
- Synthesis (Research and Education centre)
- LudusXR (Game and Software development company)
- Wisamar (Non-profit educational institution)
- Eshob (Private school and non-profit foundation)
